ANTUR DEB NATH

anturdebnath.dev@gmail.com • +8801770125058 • Dhaka, Bangladesh

PROFESSIONAL SUMMARY

Frontend-focused developer specializing in React.js and CSS-driven, component based UI - from responsive layouts to interaction detail via Framer Motion. Built a multi-module ERP interface (inventory, sales, accounting) and independently engineered a custom canvas based VSCode extension from scratch. Strong on performance optimization (lazy loading, component-level tuning) and RESTful API integration (Laravel, MySQL).

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3 (Flexbox, Grid, Responsive Design), Tailwind CSS, Bootstrap, Framer Motion

Backend: Laravel, Node.js, RESTful API Development

Database: MySQL

Languages: C, C++, Java

Practices: Component-Based Architecture, Lazy Loading & Performance Optimization, Debugging & Refactoring, Git & GitHub

Tools: Postman, Cloudinary, Vercel, VS Code

PROFESSIONAL EXPERIENCE

Full Stack Developer | MystrixIT, Dhaka, Bangladesh *Feb 2025 - Aug 2025*

- Rebuilt key UI screens in React.js, Tailwind, and Bootstrap to resolve mobile responsiveness and accessibility gaps across the application.
- Designed and integrated Laravel/MySQL backend APIs connecting previously siloed modules, enabling seamless real time data flow.
- Diagnosed rendering bottlenecks in high-traffic React components and applied lazy loading to reduce initial load time.
- Led debugging and refactoring passes ahead of feature releases, improving UI consistency and release stability.

PROJECTS

Praasad Group ERP System | Full Stack Developer

Tech: React.js, Laravel, RESTful APIs, MySQL, Tailwind CSS, Framer Motion

- Architected a full ERP system spanning inventory, sales, customer management, and accounting modules, replacing manual tracking processes.
- Built reusable, Framer Motion-animated UI components for complex, data-dense modules, improving usability across the platform.
- Implemented RESTful CRUD endpoints and Cloudinary based media handling for secure, optimized user and product uploads.
- Partnered with the backend team to redesign Laravel API endpoints for improved performance and reliability.

FileSketch - VSCode Extension | Solo Developer

Tech: Node.js, VSCode Extension API, HTML5 Canvas, JavaScript

- Designed and published an open-source VSCode extension for in-editor, per-file whiteboarding.
- Engineered a persistent, file-aware canvas that auto syncs drawings with the active file.
- Built a custom vector drawing engine from scratch - shapes, text, smooth strokes, zoom/pan, unlimited history.
- Designed the storage layer to isolate all notes in VSCode global storage, ensuring zero project-file pollution across restarts.
- Added tool specific custom SVG cursors and full keyboard shortcut coverage to reduce friction in common sketching actions.

COMPETITIVE PROGRAMMING

- Achieved a rating of 1052 on CodeChef, demonstrating consistent performance in algorithmic problem solving.
- Solved 80+ problems on Codeforces, covering arrays, strings, recursion, and data structures.

EDUCATION

Bachelor of Science in Computer Science and Engineering *Expected Graduation: Sep 2026*

Northern University Bangladesh, Dhaka, Bangladesh

LANGUAGES

Bangla (Native) • English (Fluent) • Hindi (Fluent)
