ANTUR DEB NATH

Dhaka, Bangladesh | +8801770125058 | anturdebnath.dev@gmail.com

PROFESSIONAL SUMMARY

Frontend Developer Intern with six months of hands-on experience building the interface for a 6-module ERP system using React.js, Tailwind CSS and JavaScript. Strong on RESTful API integration, reusable component architecture and performance optimization (lazy loading, component-level tuning), with a CSS-driven approach to responsive UI.

EXPERIENCE

Frontend Developer (Intern) | MystrixIT Six months

- Contributed user interfaces for 6 functional modules (payroll, sales, installments, leads, rental management, access control) to the Prashad ERP system, by developing responsive interfaces with React.js and Tailwind CSS.
- Kept payroll, sales and installment records accurate on screen across the ERP system, by integrating React.js screens with the Laravel and MySQL backend APIs.

PROJECTS

Prashad ERP System React.js, Tailwind CSS, Laravel, MySQL

- Kept screens consistent across all modules, by building them from reusable React.js components styled with Tailwind CSS.
- Confirmed that each screen received the right data, by testing the Laravel API endpoints with Postman before connecting them to the interface.
- Loaded module screens only when needed, by applying lazy loading and component-level performance tuning.

Deepfake Video Detection Using Hybrid Spatio-Temporal Deep Learning Python, PyTorch

- Achieved 96.74% accuracy and 0.9795 AUC-ROC on 828 unseen test videos (Celeb-DF v2), using 11× fewer trainable parameters than a 159.7M-parameter ensemble baseline, by designing a ViT-BiGRU-Attention model.
- Ensured reliable, leakage-free results across 6,529 videos, by applying a strict identity-disjoint split with zero subject overlap between train, validation and test sets.
- Delivered a FAKE/REAL verdict in under 0.10 seconds per video, by building an interactive upload-and-detect interface with FP16 GPU inference.

EDUCATION

B.Sc. in Computer Science & Engineering, Northern University Bangladesh Graduated: 2026

CGPA: 3.53

TECHNICAL SKILLS

Frontend:	React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, responsive UI, component-based architecture
Backend & APIs:	Laravel, MySQL, RESTful API integration, Postman
Programming:	Python, C, C++, PyTorch
Fundamentals:	Data Structures, Algorithms, Object-Oriented Programming
Tools:	VS Code, GitHub, Jupyter, Kaggle

ACHIEVEMENTS & ACTIVITIES

- Achieved a rating of 1052 on CodeChef, showing consistent performance in algorithmic problem solving.
- Solved 80+ problems on Codeforces, covering arrays, strings, recursion, and data structures.

LANGUAGES

Bengali: Native | English: Professional Working Proficiency | Hindi: Fluent
